New Mexico has seven daily papers,

better.

ROTAL A. JOHNSON was elected to the city council last evening to represent the first ward, vice W. H. Smith, resigned. The election of Mr. Johnson is a most excellent one,

Ir the Paul smelter proposition be accepted, he will agree to blow in said to work, and in case one stuck shall second one will be added thereto. This proposition to our mind, is the best one and we trust that those interested will see it in that light.

therefore, to be hoped that they will not fail to take advantage of it.

GEORGE FRANCIS TRAIN, a well known lunstic, recently harrangued a crowd of New York socialists and pronounced in favor of hanging the judges that imposed the death sentence on the Chicago anarchists. On the whole, the talk of this blatherskite may be perfectly harmless, but he was cheered to the echo by the red communists, among whom he has an influence for evil. A straight isoket in a lunatic asylum is the roward Train is surely earning for himself, and the sooner it is meted out to him, the

THE removal of the San Carlos Apaches out of the territory, is a question in which the people of Arizons are deeply interested. Of course we are all anxions to have them removed somewhere. At present there is no place where they can be sent, and as no other state or terri tory wants them, it would be a gross injustice to force them upon them. for the present. His idea of separating know that General Mules has the inhis whole design is to prevent Indian

This Casa Grande Land and Improvelap of Arizona just as soon as the pouple living on their 400,000 square males of it. Probably they were short of small rived-only this and nothing more.

NATIONAL REPUBLICAN: American builders build the fastest small vessein let protection be withdrawn and let in the world, as the Volunteer again demonstrated yesterday by besting the crack Scotch cutter about four triles in 6 run of thirty-eight. Years ago American builders and designers built "the greyhounds of the ocean" and had almost the carrying trade of the world. When steam came to take the place of sails the American was still first. American genius first placed the iron plated war ship affeat, and yet American has neither a commercial nor a war navy England, France, Germany, Austria, Italy, all encourage their people to build ships to carry the products of those countries to "the uttermost parts of the earth." They give bounties to the men who build and sail these vessels. Amerios, with more coast line than all Europe, not only refuses to aid its slap owners and shipbuilders, but actually gives the preference to foreigners as mail carriers and pays the highest prices for second hand and second rate foreign designs for its war ships. It is time to change this. To stop paying \$150,000,000 every year to foreign shipowners to transport goods to and from American ports. To stop the driving American goods out of foreign ports because there are no means of direct communication. The change will be a sober second thought

It has been a mystery to many wby some one of our citizens made no effort to secure money for a smelter instead of entrusting this important part of the programme to outsiders and strangers, whose only care was to see what they could make out of them. Time and money has been subscribed by the business men of the town who recognized the value of a smelter plant located hereabouts. The misfortune heretofore has been that the would-be smelter builders had no money of their own, but were auxious to handle that of other people, wanted in fact the donors to plant and ores, and pay them an additional bonus for the privilege of handling the cash. Now, however, a different proposition comes to the front and one that surely will if supported one half as liberally as the schemes of out-siders have been. We refer to that now being made by Mr. Paul, who owns a first-class smelter plant, at the Columbia privilege comunications was touched fifteen in one body that ventured to Copper camp. He asks the loan of \$5000. to defray the expenses of moving it and was plainly foreshadowed. making such alterations as may be

TORTILITA MINES.

a very strong arraignment of the comnonneing them, but unfortunately it is not.-Globe Silver Belt.

smelter every Monday morning and keep not prepared to deny, but we do know what has been done. it in operation so long as there are ores that neither the mines nor their management are to blame for it. Under the prove insufficient to handle said ores, a supervision of T. D. Elmorethese mines, If the people of Tueson and configu- need is hoisting machinery and a liarger one camps know a good thing when they mill. le. Fight the devil with fire.

THE present national administration seems to favor the scripture precept to multiply and replenish the earth. Scarcely has become cold the story of the lady clerk, who went to Secretary Fairchild and said, "Mr, Secretary, I am engaged to be married to a young man, clerk in snother department, but his ed to the sergeants who commanded the salary is not sufficient for our support if I am compelled to resign mine." The of the Hill of the Bails, in Queretaro, Scoretary replied, "My child marry and June 19, 1867. These rities were delivpool your salaries. I know of no law in ered by the general of the state militis this department requiring clerks to remain single." And now comes this similar story concerning Secretary Lamar. A young lady from Colorado wrote to him: "Please answer a question in which I am greatly interested. Supposing a young woman has filed on a half section of government land, and a young man has a pre-emption claim joining, and in the same section. They wish to get married; must the young woman dispose of her claim or pay for territory. The defendants were repreit? Or, if she be allowed to retain the claim, must the young man dispose of ritory by District Attorney English his'n?" The galiant Secretary, it is gratifying to know, decided all the advisement until this morning, when he points in the defendent's favor, and by made when the people give this subject this time, probably, two hearts that was manifested in the tried by stock best as one, are made happy and their laims left undisturbed; in which there is a tacit injunction to all who will go and likewise, thereby adding to the wealth and census returns of a grateful

JUDGE WRIGHT, of San Francisco, has lecided that a newspaper reporter cannot be put upon the witness stand and empelled to divulge the source of inormstion, of any item of news he may have published in his paper, the court holding that such a proceeding would be against public policy, as the public look to the newspapers for news, and any cattle to their custody.-Prospector. method by which they could be compelled to divulge their information would lose to them many sources of imporforeshadowed in the attempt by Congress to make Hallet Killbourn divulge certain matters that gave him points on of Winslow, and Messrs. Haws and Congressional rescality. In that case Scarlet, of Navajo, to Canon Creek, it was decided that a Congressional at this point the trail was lost. The
